

22nd-23rd March 2006, Belgrade, Serbia.

The Faculty of Mining and Geology of the University of Belgrade is to host an experts meeting entitled "Management of Dinaric Karst Aquifer" (Enhancing Sustainability Through Improved Management of Transboundary "Sub-Surface Space"). The meeting aims to exchange information and to review a first draft of a proposal dedicated to the Dinaric Karst Transboundary Aquifer System (DiKTAS), and the ecosystems dependent on them to be prepared by UNESCO-IHP and the UNESCO Regional Bureau for Science and Culture in Europe.
