

30th September-11th October 2007, Vrsar, Croatia.

INWEB will attend the NATO institute on “Uncertainties in Environmental Modelling and Consequences for Decision making” to be held in Vrsar, Croatia. At the institute top specialists in the field will lecture on a range of topics related to modelling uncertainties, and will illustrate some of the issues involved, for example with predicting global warming, the fate of pollutants in aquifers, and a number of other current environmental problems.
