

4th-6th September 2006, Newcastle, U.K.

The UNESCO-HELP Programme, in collaboration with the Environment Agency of England and Wales and the CHASM team held a workshop hosted by the Newcastle University on the "Future of rural land and water management; Research strategies to underpin integrated decision making". Prof. Ganoulis presented INWEB's work on the Nestos-Mesta River HELP basin as a case study to illustrate the issues and lessons learned in this sensitive field.
