

20th-24th April 2005, Thessaloniki, Greece.

This workshop will be held in Thessaloniki from 20th-24th April 2005. The local coordinator is Prof. J. Ganoulis of INWEB. Participants will discuss applications of the analytical framework of comparative risk analysis (CRA) and multi criteria decision analysis (MCDA) to environmental security and emergency preparedness in coastal areas and to other situations where limited environmental resources could result in major security threats. It will build on frameworks and tools reviewed and developed at the Society for Risk Assessment workshop on CRA and MCDA applications for sediment management.
