9th-11th September-2009, Berlin, Germany

The EnviroInfo 2009 conference is a meeting place for experts and practitioners on leading ICT technologies and aims to report about state-of-the-art applications of ICT as well as newest developing trends in the field of environmental informatics. It covers cross-cutting topics like applications of geographical information systems, environmental modelling and simulation, risk management, material and energy flow management, climate change, tools and database applications and other aspects with regard to the main topic ICT and the environment. At the special session on ICT for Sustainable Use of Natural Resources UNESCO Chair INWEB presented work on
Web-based Interactive Databases of Shared Water Resources for Ecosystems Preservation.
