

29th-30th May 2007, Paris, France.

This workshop, organised by UNESCO-IHP, the Académie de l'Eau and the BRGM, will be held at UNESCO headquarters. It aims to underline the importance of transboundary aquifers across the world and to affirm the interdisciplinary nature of water management as well as the necessity to create a common language between the different disciplines. INWEB coordinator Prof. J. Ganoulis will participate.
